**Utilities change management based on AquaRating**

**Target Audience**

Water utilities, regulators, development banks, water practitioners, auditing consultants, researchers on the topic

**Description**

This webinar will focus on the process of changing a water company: from assessment to implementation of an action plan and attracting necessary funding. The process will be explained by water companies who have gone through the process and by donors who will share details on the main requirements to attract funding to the water sector. Case studies will be presented from Mali and Lebanon.

**Learning Objectives**

- Method to assess the performance of water and sanitation utilities;
- What actions to take following the assessment;
- How to use results of assessment to attract funding;
- Good understanding of the AquaRating performance assessment methodology;
- Getting insights in real cases of utility change management in different regions, main challenges, achievements, lessons learned, and next steps;
- Ask questions to a panel of international experts

**Host**

International Water Association

**Panelists**

- Corinne Cathala, Lead Water and Sanitation Specialist at Inter American Development Bank
- Urs Hagnauer, Head Project Office, Embassy of Switzerland in Lebanon

The banner features a background image of water with light reflections. The main title 'Utilities change management based on AquaRating' is centered in large white font. Below the title, the IWA logo (with the tagline 'the international water association') is on the left, followed by the word 'WEBINAR' in large bold letters. To the right of 'WEBINAR' is the date '30 October 2019' and the time '15:00hrs Amsterdam time'. The AquaRating logo is on the far right.
