

IWA organiza webinar sobre ciudades inteligentes sobre manejo del agua

Oportunidades e impacto para el sector de agua, saneamiento e infraestructura:

La [Asociación Internacional del Agua](#) (IWA por sus siglas en inglés) organiza el webinar sobre ciudades inteligentes en el manejo del agua y los objetivos de desarrollo sostenible.

Este evento está dirigido a gerentes de empresas de agua y saneamiento, entidades de regulación, profesionales del agua, académicos y gobiernos municipales.

Entre los temas a tratar en este webinar están: discutir los objetivos de desarrollo sostenible del sector agua y saneamiento y manejo inteligente del agua en las ciudades, intercambiar experiencia para promover una mayor participación de actores en el diseño de la planificación urbana, aprendizaje de casos de estudio y soluciones innovadoras.

Fecha: jueves 5-noviembre-2020

Hora: 9h00 Amsterdam, 03h00 am de Ecuador continental

Idioma: Inglés

Water-Wise Cities: Towards the SDGs

Target Audience

Urban water managers and decision makers from water utilities, municipalities and advisors in the water sector

Description

To deliver action on the 2030 Sustainable Development Goals, cities are crucial agents of importance to secure health and well-being of citizens and the environment. Holistic approaches and cross-sectorial partnerships are important to develop water for smart liveable cities. By presenting insights from cities that are striving to become water-wise, this webinar kicks off discussions on stakeholder inclusion, sustainability and water-wise cities. It will continue at the SDG Summit and workshops taking place at IWA World Water Congress in May 2021 in Copenhagen.

Learning Objectives

- Feel inspired to come to the IWA Congress in Copenhagen and be able to take part in the discussion on the Sustainable Development Goals and Water for smart liveable cities and the actions needed to progress to improve sustainability in the water sector
- Exchange knowledge and experience on how water-wise cities promote stakeholder integration and facilitate improved urban planning and design
- Awareness and learning from and between case study cities presented during the webinar on new and innovative solutions

Host: International Water Association

Panelists

- Corinne Trommsdorff CEO & Founder, Water Cities
- Katharine Cross International Water Association
- Miriam Feilberg DANVA
- Lykke Leonardsen City of Copenhagen
- Hannah Pexton Manager Land and Collaborative Planning, Melbourne Water
- Jianbin Wang Monash University, Melbourne
